

NAVI SOHI

Staff Technical Program Manager

San Jose, California

Navi.K.Sohi@gmail.com | [linkedin.com/in/navisohi](https://www.linkedin.com/in/navisohi) | github.com/PlainJane20 | plainjane20.github.io

EXECUTIVE SUMMARY

Staff Technical Program Manager with 12+ years **orchestrating enterprise transformations, mission-critical system migrations, and 0-to-1 product launches** for Alphabet (Verily/Google), Apple, and Palo Alto Networks. **Recipient of Google Tech Award** for reducing architectural complexity 81% during complex divestiture—consolidating 172 integrations into 32 streamlined APIs while maintaining zero security incidents.

Delivered multimillion-dollar operational improvements across 40K+ global users through strategic vendor elimination, process automation, and infrastructure consolidation (*see [metric-ledger.md](#) — component figures verified individually; aggregate pending reconciliation of savings vs. avoidance vs. revenue and overlapping periods*). **Recognized as top-tier performer** — Top 5% (two quarters), Top 10% (two quarters); operated as the 'Operational Anchor' navigating 50%+ team turnover while **protecting engineering velocity** and maintaining 100% operational continuity. **Owned end-to-end vendor management for 3 Workday Functional Consultants** — hiring, onboarding/offboarding, budget ownership, hours/timecard approval, and mentoring. Separately, through cross-functional coaching, **mentored 12 peers and colleagues across Google, Apple, Verily, and Sutter Health** (3 internal Workday engineers and 2 peer TPMs at Verily, 2 program managers at Google, 3 program managers at Apple, 2 HRIS/financial team members at Sutter Health) on governance process, program unblocking, and stakeholder management — training them on the change control process, JIRA/Confluence, the Agile/SAFe framework, intake/demand management, the Tier 0 governance and GDPR/SOC 2 compliance frameworks, and the executive stakeholder reporting established for the role.

Expert in **cross-functional governance** for multi-party programs (Google/Samsung/Qualcomm), **enterprise platform modernization** (Workday, SAP, Salesforce), and **influence without authority** in matrixed organizations. Experienced in SAFe; certified as a Scrum Master (CSM), PMI Agile Certified Practitioner (PMI-ACP), and in Generative AI for PM. **Uses company-approved enterprise AI tools daily in current role:** Claude to synthesize raw cross-stream updates into concise, exec-ready briefings; Jira Roovo to map cross-epic dependencies and diagnose stalled sprint health; Gemini to turn live meeting discussions into assigned action items; and Codex to review API schemas and technical specs for edge cases and data-flow issues.

PROFESSIONAL EXPERIENCE

Verily Health (Formerly Google Life Sciences) | Staff Technical Program Manager, Planning & Compliance | May 2024 - Present

Enterprise Transformation & Compliance Leadership

- **Achieved near-zero audit error rate** across 4 downstream systems (SAP, BlackLine, Coupa, BigQuery) by architecting Tier 0 data governance framework ensuring GDPR/SOC 2 compliance with automated controls and real-time monitoring
- **Accelerated strategic roadmap deployment from months to 3 weeks** for Tier 0 Dual-Bank Migration (SAP Multi-Bank Connectivity) by establishing comprehensive business continuity and disaster recovery protocols across international markets
- **Eliminated manual security risks while achieving 100% data integrity** by directing the design and delivery of a secure REST API integration with Refinitiv (partnered with engineering) implementing encryption, access controls, and automated FX rates workflows
- **Reduced approval cycles 30%** by streamlining engagement and governance models with IT leadership; optimized change control boards, automated workflows, and aligned stakeholder frameworks
- **Leading FedRAMP-driven Okta Commercial → Okta Gov migration** (in progress) spanning 202 applications across six planned waves; coordinating U2F/YubiKey re-enrollment and password resets for ~800 impacted employees to meet federal compliance requirements
- **Leading JAMF-to-IRU migration** (in progress) — Verily's new macOS device management platform — coordinating phased rollout waves (on-demand, white-glove, forced migration) across the employee device fleet; completed the White Glove migration phase and backed up JAMF production data ahead of full JAMF retirement

GenAI Enterprise Adoption (SETI AI — Systems Engineering & Technology Integration — Gemini Enterprise)

- **Leading Verily's Gemini Enterprise AI rollout** (in progress) — an enterprise GenAI deployment aimed at driving organization-wide productivity and efficiency ROI; owns the program end-to-end from use-case finalization and auth setup through solution deployment, testing/validation, user-adoption enablement, and documentation/transition
- **Conducted user-enablement sessions with the Bytecode/GECX team** and directing production Terraform infrastructure build-out for launch (partnered with engineering on execution), coordinating rollout-availability communications to company leadership (Veeps)

Velocity Protection & Operational Excellence

- **Protected engineering velocity during 50%+ team turnover** by implementing V2 efficiency metrics and narrative-driven dashboards translating raw JIRA data into executive-ready insights; reduced escalation response time 85% to a 2-hour SLA for 7-8 key stakeholders

- **Uses company-approved enterprise AI tools daily** to extend that same discipline: **Claude** to synthesize raw cross-stream updates into concise, exec-ready briefings (red flags, blocked milestones, decisions needed); **Jira RoVo** natively in Jira to map which open tickets block a given epic/release and surface high-priority bugs stalled without updates; and **Gemini** in Google Meet during cross-functional syncs to transcribe discussions, extract action items, and assign owners — converting meetings into tracked, owned actions
- **Minimized context-switching overhead** by establishing clear intake processes and priority frameworks; served as “operational anchor” through 4+ HRIS departures — **owned end-to-end vendor management for 3 Workday Functional Consultants** (hiring, onboarding/offboarding, budget ownership, hours/timecard approval, and mentoring), and separately **coached 3 internal Workday engineers** (cross-functional) — maintaining 100% operational continuity while defining strategic transformation vision
- **Delivered \$750K+ in realized vendor cost savings** by eliminating 4 underperforming vendor contracts — Cognizant, Accenture, IMIH, Docebo — through data-driven performance analysis
- **Transferred 46+ HRIS projects in-house**, reducing dependency on outside vendors and migrating 200+ external users onto internal systems

Salesforce CRM Ecosystem, Integrations & AI-Powered Sales Enablement

- **Led Salesforce-Slack CRM integration** enabling commercial teams to query opportunity status and pipeline data directly from Slack channels — maximizing rep productivity and eliminating tool-switching
- **Spearheaded migration to native Salesforce-Gmail integration**, automating lead capture and decentralizing email logging; ensured 100% CRM visibility for sales activities while eliminating third-party licensing costs
- **Managed end-to-end Salesforce-Jira integration** eliminating manual swivel-chair operations; partnered with SaaS and architecture teams on build-vs-buy evaluation, architectural path mapping, and budget approval
- **Drove technical discovery and transition** from manual workflows to Salesforce Web-to-Case and Flow-based auto-responses, mapping user touchpoints to automated triggers to establish a single, scalable system of record
- **Directed Salesforce Revenue Cloud & CPQ (Configure, Price, Quote) implementation**, automating product pricing, quote generation, and financial approvals while managing cross-functional technical dependencies with Finance (SAP) and CLM systems
- **Architected bi-directional data sync between Stonly and Salesforce**, resolving SSO user-matching and data-schema-mapping challenges to automate case intake and ensure accurate field updates
- **Managed development of an AI-powered product chatbot (Agentforce)** integrating multiple internal repositories for instant product-data access — reducing dependency on product teams and improving sales response times
- **Implemented automated CRM data archival framework** for large-scale data objects, applying retention-based transition logic and establishing a formal approval gateway with Legal and Compliance

Enterprise Platform Transformation (Google Tech Award Recipient)

- **Reduced architectural complexity 81%** (172 legacy integrations → 32 streamlined APIs) by orchestrating Project Flywheel—Workday divestiture for 2,000+ employees deploying 10 modules with microservices architecture
- **Mentored 2 peer TPMs on the Verily PMO team** on governance process, program unblocking, and stakeholder management
- **Achieved 97% SSO migration success rate with zero security incidents** by overseeing execution of 1,398+ E2E test cases and migrating 30 SSO integrations; reduced risk exposure 40% through comprehensive testing and governance protocols
- **Uses Codex daily** to review API schemas and technical specs for integration work like the SSO migration above, flagging edge cases and data-flow issues to assess technical lift without pulling an engineer off task
- **Slashed implementation hours 92%** by directing the 0-to-1 launch of a People Analytics Module with AI-powered talent acquisition integrations (partnered with engineering on build)
- **Launched Verily's first Workday Performance Review cycle**, transitioning from ViaPeople and delivering measurable cost savings (*specific dollar figure pending verification — see [metric-ledger.md](#)*)
- **Accelerated program delivery 40%** by transforming HRIS operating model with SAFe principles and JSM workflow; delivered 4 Tier 1 programs with zero production incidents and 100% control board approval
- **Authored the AFIT Demand Management Playbook**, standardizing time-based estimating across IT Engineering teams; drove full mandatory adoption across 100% of targeted teams with a 95% compliance rate on time-based estimates
- **Established CI/CD pipeline automation** for configuration management reducing ticket resolution time 35%; implemented DevOps practices enabling rapid deployment while maintaining compliance controls

Google LLC (via Artech) | Sr. Staff Technical Program Manager, AR/XR (Samsung Galaxy XR) | Oct 2023 - Apr 2024

0-to-1 Product Launch & Cross-Company Leadership

- **Delivered 100% of P0 Day-1 milestones for global launch** of Project Moohan (Samsung Galaxy XR spatial computing platform) by orchestrating 150+ engineers across Google, Samsung, and Qualcomm
- **Partnered with engineering leadership to define system architecture and multi-year product roadmaps** for the mixed-reality program; shaped product vision working backwards from customer requirements while ensuring 100% GDPR/CCPA compliance
- **Implemented Scaled Agile Framework (SAFe) across 3 global organizations** tracking dependencies, risks, and deliverables; coordinated product management, engineering, QA, legal, and marketing stakeholders ensuring on-time delivery
- **Mentored 2 program managers** on cross-functional coordination across Google, Samsung, and Qualcomm—coaching them on technical governance, dependency tracking, and stakeholder reporting for the multi-company program

Quality Engineering & Cost Optimization

- **Reduced stale bug issues 40%** by engineering automated bug management workflow with Python/JavaScript dashboards; maintained strict 3-day SLA for P0/P1 defect resolution driving data-driven prioritization

- **Protected team velocity** through real-time tracking of unassigned bugs and stale POs; developed automated reporting infrastructure enabling engineering leadership to make evidence-based resourcing decisions
 - **Cut R&D overhead \$4M annually** by directing implementation of a shared CI/CD testing suite and DevOps automation across Google/Samsung/Qualcomm (partnered with engineering on build); established joint governance model reducing technical blockers 40%
 - **Streamlined release management** coordinating feature progress from development through QA validation; collated weekly release notes maintaining strict quality gates for consumer-facing product
-

Apple Inc (via TheoremOne) | Staff Program Manager, Retail Operations & Analytics | Sep 2022 - Sep 2023

Enterprise CRM & Global Operations Leadership

- **Achieved 100% milestone delivery on schedule** for Salesforce CRM implementation by coordinating cross-departmental teams across software, hardware, and QA workstreams
- **Drove adoption of Scrum Master and SAFe methodologies** engaging executive stakeholders at critical SDLC stages; transformed stakeholder needs into BRDs/PRDs for next-gen retail solutions
- **Orchestrated programs for 40K+ staff across 500+ stores in 26 countries** streamlining customer journey across Personal Pickup, Genius Bar, and Today at Apple experiences
- **Mentored 3 program managers** on cross-team execution and retail operations coordination—coaching them on data/analytics rigor and stakeholder management across software, hardware, and QA workstreams

Data Architecture & Performance Optimization

- **Reduced manual analysis 35% while driving \$2M+ revenue optimization** by directing the architecture of a Snowflake data warehousing and Tableau BI ecosystem (partnered with data engineering) consolidating 12+ data sources with ETL/ELT pipelines
 - **Decreased customer wait times 22% and increased Genius Bar throughput 1.5 sessions/hour** by implementing REST/GraphQL APIs optimizing workflows across 10M+ transaction records
 - **Scaled customer feedback platform 10X** (10K → 100K+ monthly responses) through CXM platform optimization enabling data-driven retail decisions and real-time insights
-

Palo Alto Networks (via ProUnlimited) | Staff Technical Program Manager, Security Engineering & Analytics | Mar 2021 - Jul 2022

Security Automation & Infrastructure Leadership

- **Reduced security incident response time 25%** by directing development of REST/GraphQL APIs (Python/JavaScript, partnered with engineering) automating workflows across 8+ security systems (SIEM, EDR, physical security platforms)
- **Directed CI/CD pipeline automation** cutting manual overhead 30% through TCP/IP, HTTP/S, and WebSocket integrations; enabled rapid security response while maintaining audit compliance
- **Partnered with security engineering to establish a Defense-in-Depth framework** ensuring multi-layered protection across distributed systems for a 5,000+ employee organization

Data-Driven Security & Governance

- **Drove 25% improvement in MTTD and 15% reduction in resolution time** by designing KPI/OKR framework and Tableau BI dashboards ingesting 8+ security systems
 - **Analyzed 500+ security incidents using SQL and Python workflows** enabling data-driven security decisions; developed Enterprise Risk Dashboard for C-suite informing strategic investment priorities
 - **Established security metrics framework aligned with ISO/SOC 2 requirements** partnering with engineering to embed security-first SDLC principles; drove cross-functional alignment on technical roadmap
-

Sutter Health (Palo Alto Medical Foundation) | Sr. HRIS Manager / Sr. Financial Analyst | Jul 2013 - Oct 2020

Enterprise HRIS & Financial Operations Leadership

- **Delivered \$4M+ in annual savings** by developing custom performance-monitoring models for 58 private practices across 15 medical specialties using Lean Six Sigma methodologies
 - **Optimized billing and cost-variance processes** through operational excellence frameworks; applied Six Sigma DMAIC methodology to streamline physician compensation workflows
 - **Achieved 12% efficiency increase** by automating monthly and quarterly compensation reconciliations for 10,000+ employees across 20+ facilities
 - **Managed Workday HCM, Advanced Compensation, Benefits, and Time Tracking** as primary technical expert; coordinated with Payroll, IT, and Finance teams ensuring seamless integrations
 - **Launched P360 centralized physician data engine** consolidating Epic IDs, credentialing, and leadership tiering into single source of truth for \$500M+ annual compensation spend
 - **Mentored and coached 2 HRIS/financial team members** on compensation reconciliation processes and Workday system administration, building internal bench strength across the HRIS function
-

Earlier Career Progression | Jan 2000 - Jul 2012

U-Systems (GE Healthcare) | Sr. Corporate Program Manager | 2010-2012

Yahoo! Inc | Legal Trademark Program Manager | 2006-2007

Hitachi GST | Legal Program Manager | 2005

Volterra Semiconductor (acquired by Maxim Integrated), Fremont CA | Sr. Administrative Assistant / Engineering Technician / QA Assistant / Inventory Control Technician | 2000-2004 (4 years) — silicon test data & SPC charts, ATE final/qual test, component inventory & kitting, exec support to CEO/VPs/R&D at a startup that went public shortly after

INDEPENDENT AI/AGENT ENGINEERING PROJECTS (2026)

14 independently built, tested AI and agent systems (Python, mostly Claude-based), github.com/PlainJane20 — self-directed, not employer work. Most are complete, tested repositories rather than deployed production services with live users; [taskloom](#) has 114 automated tests, and specific deployment/usage status per project should be confirmed case-by-case before claiming production status in an interview:

Multi-Agent Orchestration: [tpm-agent-os](#) (multi-agent Claude pipeline modeling a Staff TPM operating model — risk lensing, build-vs-buy panels, RAG/OKR status, redirect-or-kill calls, auto-generated mentoring playbooks) | [signalweave-ai](#) (human-governed multi-agent program intelligence — strategy, architecture, risk, capacity, economics) | [switchboard](#) (git-native ticket router for a fleet of specialist AI agents — deterministic tag-match routing, Claude-assisted fallback, risk-tiered dispatch, append-only ledger)

AI Governance & Risk Controls: [agent-control-tower](#) (governance controls for AI agents — budgets, approvals, audit trails, risk-tiered external actions) | [spec-review-agent](#) (parallel AI review of specifications across ambiguity, feasibility, privacy, completeness, ownership)

Program/Portfolio Automation: [pm-automation-system](#) (governed Jira Epic intake, lifecycle automation, roadmap visibility, capacity planning) | [critical-path-radar](#) (deterministic Critical Path Method analysis over Jira dependencies — slack, risk ranking, Gantt output) | [tarmac](#) (enterprise delivery control plane — portfolio triage, architecture, release, monitoring, automation, governance)

Evidence-Based Reporting & Evaluation: [exec-status-rollup](#) (evidence-based executive portfolio rollups — deterministic RAG scoring, trend history, grounded AI narration) | [incident-postmortem-agent](#) (grounded, blameless postmortem drafting from Slack/Jira evidence, with adversarial hallucination evaluations) | [slack-daily-brief](#) (eval-tested Slack briefing agent for decisions, actions, blockers, day-over-day follow-through)

Personal Productivity Automation: [inbox-marshall](#) (human-governed Gmail organization — reversible automation, safety gates, privacy-first local execution) | [it-agent-platform](#) | [taskloom](#)

EDUCATION

UC Berkeley Extension | Certificate, Data Analytics & Computer Science | 2020-2021 — Python, JavaScript, HTML/CSS, SQL, API Interactions, Tableau, Fundamental Statistics, Machine Learning (TensorFlow, scikit-learn), R, Git/GitHub

California State University, East Bay | Bachelor of Science: Industrial & Organizational Psychology | 2012

CERTIFICATIONS

PMI Agile Certified Practitioner® (PMI-ACP®) | Certified Scrum Master® (CSM®) | Generative AI for PM

Lean Six Sigma Green Belt | Lean Six Sigma Black Belt (In Progress) | Generative AI with Large Language Models (DeepLearning.AI/AWS) (In Progress)

CORE COMPETENCIES

Strategic Leadership: Enterprise Transformation | Post-Merger Integration (M&A) | Divestiture Programs | Executive Stakeholder Management | Velocity Protection | Cross-Functional Leadership | Portfolio Management | Influence Without Authority

Technical Excellence: System Architecture | Cloud Infrastructure | Microservices Architecture | Platform Modernization | API Strategy | SDLC Optimization | Site Reliability Engineering (SRE) | CI/CD Pipeline Development

AI/LLM Delivery & Engineering: GenAI Enterprise Adoption (Gemini Enterprise) | Multi-Agent System Orchestration (Claude-based) | AI Governance & Risk Controls | Adversarial Hallucination Evaluation | Agentic Process Automation | Daily Use of Company-Approved Enterprise AI Tools (Claude, Gemini, Jira RoVo, Codex)

Operational Excellence: V2 Efficiency Metrics | KPI & OKR Development | Process Optimization | SLA/SLO Management | Root Cause Analysis | Data-Driven Storytelling | Vendor Management

Agile & Delivery: Scaled Agile Framework (SAFe) | Scrum Master (Certified) | Release Train Engineering | Lean Six Sigma (Green Belt) | DevOps Practices | Context-Switching Minimization

Enterprise Platforms: Workday (HCM, Compensation, Peakon, Prism) | SAP (ERP, Multi-Bank) | Salesforce | ServiceNow | JIRA | Confluence

Data & Analytics: Python | JavaScript | SQL | BigQuery | Snowflake | Tableau | ETL/ELT Pipelines | Data Warehousing | Narrative-Driven Dashboards

Governance & Compliance: ISO/SOC 2/SOX | GDPR/CCPA | Cybersecurity Compliance | Change Control Board (CCB) | Audit Readiness | Business Continuity Planning (BCP)
