

Navi Sohi

Staff Technical Program Manager

San Jose, California

Navi.K.Sohi@gmail.com | [linkedin.com/in/navisohi](https://www.linkedin.com/in/navisohi) | github.com/PlainJane20

Summary

Staff Technical Program Manager with 12+ years of experience driving enterprise transformations, mission-critical system migrations, and flagship product launches for Alphabet (Verily/Google), Apple, and Palo Alto Networks. Recipient of the Google Tech Award for orchestrating a complex Alphabet divestiture, reducing architectural complexity by 81%. Recognized as a top-tier performer (Top 5% for two quarters, Top 10% for two quarters); acted as the 'Operational Anchor' for the organization, navigating ambiguity and high-stakes transitions by exercising influence without authority to maintain program velocity.

Strategic Leader delivering \$3.4M+ in measurable cost optimizations for 40K+ global users. Expert in Enterprise Platform Modernization (Workday, SAP, Salesforce), Cloud Infrastructure, and Microservices Architecture. Proven ability to lead cross-functional governance for multi-party programs (Google/Samsung/Qualcomm) while maintaining 100% compliance.

Experience

Verily Health - Alphabet Company | May 2024 - Current

Staff Technical Program Manager, Planning & Compliance

- **Tier 0 Data Governance & Security Compliance:** Established comprehensive data governance framework ensuring GDPR/SOC 2 compliance across 4 downstream systems (SAP, BlackLine, Coupa, BigQuery); achieved audit readiness with near-zero error rate through automated controls, real-time monitoring, and data lineage tracking
 - **Cross-Functional Program Leadership:** Bridged IT PMO, Application Engineering, Sales Operations, and executive stakeholders ensuring alignment across 25+ concurrent initiatives; translated complex technical requirements into executive-ready roadmaps for C-suite decision-making; drove strategic program outcomes through influence without authority
 - **Tier 0 Dual-Bank Migration (Zero Security Incidents):** Enabled secure global financial operations with zero disruptions establishing SAP Multi-Bank Connectivity (MBC) for two banks across international markets; deployed multi-year strategic roadmap within 3 weeks with comprehensive business continuity, disaster recovery, and security protocols; maintained 100% data integrity throughout migration
 - **FX Rates Automation (Security-First API Integration):** Architected secure REST API integration with Refinitiv implementing encryption, access controls, audit logging, and data validation; migrated from manual processes to automated workflows achieving near-zero error rate; reduced manual security risks while maintaining 100% data integrity across financial systems
 - **Governance Model Optimization:** Collaborated with IT leadership to streamline engagement and governance models; reduced approval cycles 30% through process automation, stakeholder alignment frameworks, and change control board optimization
 - **Interim Head of IT HRIS (Operational Anchor - 50%+ Turnover):** Maintained 100% operational continuity serving as "operational anchor" through 4+ HRIS departures in ambiguous environment; defined strategic vision for HRIS transformation while navigating leadership gaps; reduced escalation response time 85% implementing HRIS JIRA Portal with 2-hour SLA for 200+ stakeholders
 - **Cost Savings Portfolio (\$1.2M+ Annually):** Eliminated 5 underperforming vendor contracts through data-driven vendor performance analysis; transferred 46+ HRIS projects to internal teams and migrated 200+ external users in-house; delivered measurable ROI through strategic sourcing decisions
 - **Project Flywheel (Workday Divestiture - Google Tech Award):** Led enterprise transformation for 2,000+ employees reducing risk exposure 40%, consolidating 172 legacy integrations → 32 streamlined APIs with microservices architecture, deploying 10 Workday modules, executing 1398+ E2E test cases, migrating 30 SSO integrations achieving 97% success rate with zero security incidents
 - **Strategic Workday Implementations (AI-Powered Solutions):** Delivered People Analytics Module (0-to-1 launch) with 92% reduction in implementation hours; deployed AI-powered talent acquisition integrations ensuring GDPR/CCPA compliance; executed first Workday Performance Review cycle achieving \$150K+ savings
 - **HRIS Operating Model Transformation (SAFe & DevOps):** Accelerated delivery 40% deploying JSM workflow with SAFe principles; delivered 4 Tier 1 programs with zero production incidents and 100% control board approval while reducing ticket resolution time 35%; established CI/CD pipeline automation for configuration management
-

Google LLC (via Artech) | Oct 2023 - Apr 2024

Sr. Staff Technical Program Manager, AR/XR (Samsung Galaxy XR)

- **Program Coordination & Cross-Company Leadership:** Coordinated cross-functional teams across Google, Samsung, and Qualcomm for Project Moohan (Samsung Galaxy XR), a flagship \$1,799 spatial computing platform; established comprehensive program governance ensuring complete accountability across deliverables; delivered 100% P0 Day-1 milestones for global launch ensuring 100% GDPR/CCPA compliance
- **Cross-Functional Agile Execution (SAFe):** Implemented Scaled Agile Framework (SAFe) across tri-party teams, tracking dependencies, risks, and deliverables across 3 global organizations; spearheaded 'shiproom' initiatives for streamlined release processes and cross-team collaboration
- **Bug Governance & Quality Engineering:** Directed end-to-end testing processes, prioritized test cases, and facilitated postmortems for continuous improvement; engineered bug management workflow reducing stale issues by 40%; developed

automated Python/JavaScript reporting infrastructure and real-time dashboards tracking unassigned bugs and stale P0s; maintained strict 3-day SLA for P0/P1 defect resolution; drove data-driven prioritization decisions

- **Leadership Reporting & Communication:** Developed KPI dashboards and tracked metrics to measure development success and efficiency; provided weekly reports to Leadership enabling informed decision-making; translated technical information into user-friendly language for effective cross-company communication; compiled QA-approved features into release notes
 - **Technical Governance:** Established joint governance model reducing technical blockers 40% across Google/Samsung/Qualcomm through transparent dependency tracking and cross-company alignment
-

Apple Inc (via TheoremOne) | Sep 2022 - Sep 2023

Staff Program Manager, Retail Operations & Analytics

- **Salesforce CRM Implementation:** Acted as servant-leader coordinating departmental teams across software, hardware, QA workstreams ensuring 100% milestone delivery on schedule; drove adoption of Scrum Master (Certified) and Scaled Agile Framework (SAFe) methodologies; engaged with executive stakeholders coordinating discussions and driving decisions at appropriate SDLC stages
 - **Global Retail Operations (500+ Stores, 26 Countries):** Orchestrated programs for 40K+ staff streamlining customer journey across Personal Pickup, Genius Bar, and Today at Apple experiences; led implementation and management of store ownership programs with influence without authority; transformed stakeholder needs into BRDs/PRDs for next-gen retail solutions
 - **Data Architecture & Analytics:** Architected Snowflake data warehousing and Tableau BI ecosystems consolidating 12+ data sources using ETL/ELT pipelines, reducing manual analysis 35% and driving \$2M+ revenue optimization through automated KPI engines with real-time dashboards
 - **API Automation & Performance Optimization:** Implemented REST/GraphQL APIs reducing customer wait times 22% and increasing Genius Bar throughput 1.5 sessions/hour; optimized SQL queries on 10M+ transaction records identifying conversion bottlenecks; scaled CXM platform feedback 10K→100K+ monthly responses
-

Palo Alto Networks (via ProUnlimited) | Mar 2021 - Jul 2022

Staff Technical Program Manager, Security Engineering & Analytics

- **Security Automation & API Integration:** Developed REST/GraphQL APIs using Python and JavaScript automating security workflows across 8+ security systems (SIEM, EDR, physical security platforms); reduced security incident response time 25% through automated API-driven workflows; implemented CI/CD pipeline automation reducing manual overhead 30% through TCP/IP, HTTP/S, and WebSocket protocol integrations
 - **Security Infrastructure & Architecture:** Architected Defense-in-Depth security framework ensuring multi-layered protection across distributed systems; helped design physical security systems leveraging system architecture expertise and serial communications protocols (RS232, RS422, RS485) optimizing coverage across 5,000+ employee organization
 - **Tableau BI & Security Analytics (Data-Driven Security Decisions):** Designed comprehensive KPI & OKR framework and Tableau BI dashboards ingesting 8+ security systems for real-time monitoring; developed Enterprise Risk Dashboard for C-suite enabling data-driven security investment decisions; analyzed 500+ security incidents using SQL and Python workflows driving 25% improvement in MTTD and 15% reduction in resolution time
 - **Security Governance & Compliance:** Established security metrics framework aligned with ISO/SOC 2 requirements; partnered with engineering teams to embed security-first principles in SDLC; drove cross-functional alignment on security roadmap and risk mitigation strategies
-

Sutter Health (Palo Alto Medical Foundation) | Jul 2013 - Oct 2020

Sr. HRIS Manager (Jul 2013 - Sep 2018) | Sr. Financial Analyst (Sep 2018 - Oct 2020)

- **Fiscal Impact (\$4M+ Annual Savings):** Developed custom performance-monitoring models for 58 private practices across 15 medical specialties using Lean Six Sigma (Green Belt) methodologies; optimized billing and cost-variance processes through operational excellence frameworks; applied Six Sigma DMAIC methodology to streamline physician compensation workflows
 - **Enterprise HRIS Administration:** Managed full HRIS lifecycle including Workday HCM, Advanced Compensation, Benefits, Time Tracking for 10,000+ employees across 20+ medical facilities serving as primary HRIS technical expert; achieved 12% efficiency increase through automation of monthly and quarterly compensation reconciliations; coordinated with Payroll, IT, and Finance teams ensuring seamless system integrations
 - **Systems Architecture (P360 Launch):** Served as Program Manager for P360 launch, a centralized physician data engine integrating Epic IDs, credentialing, and leadership tiering into single source of truth for \$500M+ annual compensation spend; leveraged system integration strategy, master data management, and data governance protocols to consolidate disparate physician data sources
-

Earlier Experience | Jan 2004 - Jul 2012

U-Systems (GE Healthcare) | Sr. Corporate Program Manager | 2010-2012

Yahoo! Inc | Legal Trademark Program Manager | 2006-2007

Hitachi GST | Legal Program Manager | 2005

Volterra - Maxim Integrated | Test Engineer, R&D | 2004-2006

Education

Certification

- Lean Six Sigma Green Belt
- Certified Scrum Master® (CSM®)
- PMI-ACP®
- Generative AI for PM
- Lean Six Sigma Black Belt (In Progress)

Core Competencies

Strategic Leadership: Enterprise Transformation | Post-Merger Integration (M&A) | Divestiture Programs | Executive Stakeholder Management | Cross-Functional Leadership | Portfolio Management | Influence Without Authority

Technical Excellence: System Architecture | Cloud Infrastructure | Microservices Architecture | Platform Modernization | API Strategy | SDLC Optimization | Site Reliability Engineering (SRE)

Operational Excellence: KPI & OKR Development | Process Optimization | SLA/SLO Management | Root Cause Analysis | Budgeting | Vendor Management

Agile & Delivery: Scaled Agile Framework (SAFe) | Scrum Master (Certified) | Release Train Engineering | Lean Six Sigma (Green Belt) | CI/CD | DevOps Practices

Enterprise Platforms: Workday (HCM, Compensation, Peakon, Prism) | SAP (ERP, Multi-Bank) | Salesforce | ServiceNow | JIRA

Data & Analytics: Python | JavaScript | SQL | BigQuery | Snowflake | Tableau | ETL/ELT Pipelines | Data Warehousing | Business Intelligence | Predictive Analytics

Governance & Compliance: ISO/SOC 2/SOX | GDPR/CCPA | Cybersecurity Compliance | Change Control Board (CCB) | Audit Readiness | Business Continuity Planning (BCP)
